

Missouri River InfoLINK

Understanding the Missouri River

The Missouri River InfoLINK enhances understanding of the Missouri River. The InfoLINK is for Missouri River stakeholders who represent diverse river interests - people that want to understand how the river functions and need to make informed decisions about its management. The InfoLINK provides information through outreach materials, interactive maps, and presentations that interpret scientific findings.

The Missouri River flows 2,341 miles from the Rocky Mountains through the Great Plains to its confluence with the Mississippi River in St. Louis. Its watershed drains one-sixth of the United States. The once meandering river is channelized in the lower third and impounded by six dams in much of the upper. The U.S. Army Corps of Engineers regulates the water flow through the river system for multiple uses.

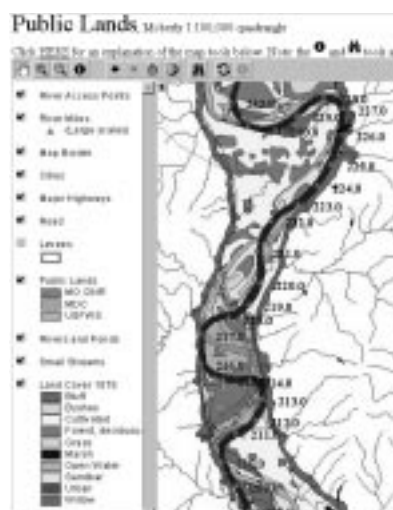

Decisions related to Missouri River management affect the lifestyles of Americans from Montana to Missouri. It is the vision of the InfoLINK partners that sharing information on the Missouri River will facilitate communication among all of the basin's citizens.

The InfoLINK partners with the Missouri River Natural Resources Committee and others to conduct the annual Missouri River Natural Resources Conference.

Jefferson City, Missouri

InfoLINK web page

To provide Missouri River stakeholders a "sense of place" and facilitate their understanding of the river's complex resource management issues, the InfoLINK provides an Information Clearinghouse on the Internet with interactive GIS maps.

The Missouri River InfoLINK is a program of the USGS Columbia Environmental Research Center

Supporting Partners

U.S. Environmental Protection Agency, Regions 7 & 8
USGS Mid-Continent Mapping Center
National Biological Information Infrastructure
USGS Office of Information and Outreach
Environmental Systems Research Institute (ESRI)
U.S. Fish and Wildlife Service, Regions 3 & 6

Community Partners

Coordinated Resource Management Program, Bismarck, ND
Missouri River Communities Network, Columbia, MO
Missouri River Basin Association
Missouri River Natural Resources Committee
